

Facial Rejuvenation Treatments (Free Consultation)

Toothkind are proud to announce that **we are now offering facial rejuvenation treatments** such as **Botox and Dermal Fillers (Restylane/Hydrofill)**. These very popular anti-aging techniques are also called non-surgical facelifts.

Dr Jag Jeer BDS. Dentist and practice principal has over 10 years experience as a dental surgeon, and has a special interest in aesthetic dentistry.

In providing the best results detailed knowledge of the facial form and anatomy is essential. Dr Jeer has completed recognised training courses in the use of Botox and Facial fillers.

Botox is a safe and extremely popular treatment with both men and women.

The most popular non-invasive anti-ageing treatments in the UK and all over the world, it is usually used on the upper third of the face to tackle frown lines, forehead creases and crows' feet (lines around the eyes). These treatments are fast, painless and safe and leave no scars or other traces on the face. A few tiny injections and within days there's a noticeable improvement. Results may vary.

Dermal Fillers are used to improve deeper folds in the skin such as at the nose-to mouth angles. It is also excellent for achieving fuller lips and can even help improve the appearance of deep scars!

Dermal fillers rehydrate the skin, lifting it up and smoothing out lines and wrinkles, making the skin look more youthful.

The consultation with Jag is absolutely free and he will assess your face and explain how these techniques can slow down the signs of aging!
